Office Action Summary

Application No.

10/675,096

Applicant(s)

MCKNIGHT ET AL.

Examiner

Melur Ramakrishnaiah

Art Unit

2643

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7, 8-14, 15-21, are rejected under 35 U.S.C 102(b) as being anticipated by Detampel, Jr. et al. (US 2001/0002927, hereinafter Detampel).

Regarding claim 1, Detampel discloses a method for call conferencing, comprising: detecting a first access to a conference bridge operable to support a conference call, receiving a pass code from the first access, and securing the conference bridge using the pass code received from the first access by allowing a second access to the conference bridge, the second access based at least partially on the pass code from the first access (figs. 1, 4, 6, paragraphs: 0006, 0011-0027, 0052-0054, 0064, 0067-0075)

Regarding claim 8, Detampel discloses an apparatus for call conferencing, comprising: one or more ports operable to receive at least one channel of a plurality of channels for a conference call, and one or more processors (not shown) collectively operable to: detect a first access to a conference bridge operable to support the conference call, receive pass code from the first access, and secure the conference bridge using the pass code received from the first access by allowing the second access to the conference bridge, the second access based at least partially on the pass code from the first access (figs. 1, 4, 6, paragraphs: 0006, 0011-0027, 0052-0054, 0064, 0067-0075)

Regarding claim 15, Detampel discloses a computer program on a computer readable medium and operable to be executed by a processor, the computer program comprising computer readable program code for: detecting a first access to a conference bridge operable to support a conference call, receiving a pass code from the first access, and securing the conference bridge using the pass code received from the first access by allowing a second access to the conference bridge, the second access based at least partially on the pass code from the first access (figs. 1, 4, 6, paragraphs: 0006, 0011-0027, 0052-0054, 0064, 0067-0075)

Regarding claims 2-7, 9-14, 16-21, Detampel further teaches the following: pass code comprises a first pass code, and allowing the second access to continue based partially on second pass code wherein the second pass code may or may not equal the first pass code, receiving the second pass code from the first access during the conference call, prompting a participant to identify whether the conference bridge, receiving the pass code in response to the participant indicating that the conference bridge is to be secured, second access is based at least partially on the pass code from the first access when the conference bridge is secured, identifying the first access as being associated with a chairperson , prompting the participant for the pass code, receiving an identification of one or more depressed numeric buttons on a communication device associated with the participant and determining whether the one or more identified numeric buttons represents the numeric sequence associated with the pass code, and wherein receiving the pass code from the first access in response to determining that the first access is associated with the chairperson, the one or more processors (not shown) are further collectively operable to allow the second access to continue based at least partially on at least one of the first pass code

Art Unit: 2643

and a second pass code, one or more processors are further operable to receive the second pass code from the first access, prompting a participant to identify whether the conference bridge is to be secured (this step is implicit as the conference scheduler is providing pass code), receiving the pass code in response to the participant indicating that the conference bridge is to be secured, second access is based at least partially on the pass code from the the first access when the conference bridge is secured, one or more processors (not shown) are further collectively operable to authenticate first and second access (figs. 1, 4, 6, paragraphs: 0006, 0011-0027, 0052-0054, 0064, 0067-0075).

Response to Arguments

1. Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melur Ramakrishnaiah whose telephone number is (571)272-8098. The examiner can normally be reached on 9 Hr schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curt Kuntz can be reached on (571) 272-7499. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
